

Announcing Telecom Council's Innovation Showcase Class of 2019

15 communications startups selected by global telcos to feature in 2019 Innovation Showcase.

Congratulations to the Innovation Showcase Class of 2019. 15 young companies were selected for this year's class by global telecom operators who represent over 3 billion subscribers in over 50 countries because they demonstrate innovative solutions that can change the way people communicate and also a viable means to bring that solution to market.

Atmosic Technologies
Augment Solutions
Conectric Networks LLC
dAlchemy
eyecandylab
Fleet Space Technologies
GigSky
Hiya
Loriot
MobileX Inc
Netobjex Inc
Rafay Systems

ZaiNar

Learn more about them at <https://www.telecomcouncil.com/forums/innovation-showcase/innovation-showcase-2019/>

We look forward to supporting their entrepreneurial journey by introducing them to our community of global telcos, communications vendors and corporate innovation teams.

About Telecom Council's Innovation Showcase:

Telecom Council's Innovation Showcase supports our ongoing mission of matching high-potential communications start-ups with strategic-fitting telcos, vendors, investors and potential partners. This year we will introduce these companies to our community at our Telecom Council Carrier Connections (TC3) annual meeting in September, where tech scouts from across the communications landscape converge to further the industry through sharing success stories, innovation roadmaps, and best practices, and meeting young innovative companies in pre-arranged, one-on-one meetings.

About Telecom Council:

Telecom Council is Where Telecom Meets Innovation. Through regular meetings and annual events, we connect global communication service providers and vendors with innovations that are pushing the industry forward - by putting telcos, vendors and investors from across the globe together in the same room with startups, demos, and entrepreneurs. Since 2001, our Forums have introduced over 2000 executives from 750 communication companies including 60 carriers across 30 meetings each year. Our Forums, members, calendar,

speaker application and membership benefits are online at <https://www.telecomcouncil.com>.
